About Me

Software engineer with **1.8 years of experience as a Java Backend Developer** building and maintaining **Java-based backend applications**. Experienced in developing **REST APIs using Spring Boot**, implementing **microservices architecture**, and working with **MySQL databases**. Skilled in **backend development**, **API integration**, **database optimization**, and **automated testing** using JUnit and Mockito.

Education

S.A. Engineering College

Bachelor of Technology in Information Technology – 8.83 CGPA

Aug 2019 – Apr 2023

Chennai, Tamil Nadu

Experience

PraVyuha Tech Solutions LLP

Associate Software Engineer

Sep 2024 – May 2025

Chennai, Tamil Nadu

- **BeeVyuha – School Management Platform:** Contributed to backend development and reporting modules for a large-scale school management system supporting administrative and academic workflows. Designed and developed dynamic reports using Jaspersoft, including parameterized dashboards and exportable PDF/Excel reports for real-time business insights.
- Developed a Proof of Concept (PoC) for WhatsApp integration using the Meta WhatsApp API, enabling real-time notifications and improving customer communication efficiency by **30%**. Authored API documentation that streamlined onboarding for developers.
- Executed unit testing using JUnit and Mockito, increasing automated test coverage by **35%**. Resolved critical production issues, reducing application errors by **25%**.
- Refined complex SQL queries used in reporting modules, reducing report generation time by **20%**. Incorporated Jaspersoft reports into web applications for real-time analytics.
- **Tech Stack:** Java | Spring Boot | MySQL | Jaspersoft | REST APIs | JUnit | Mockito | Git | Postman

Rapiddata Technologies

Software Engineer

Oct 2022 – Nov 2023

Chennai, Tamil Nadu

- Built RESTful APIs using Spring Boot microservices architecture, improving system scalability and service communication.
- Enhanced backend performance by **20%** through application optimization.
- Optimized MySQL queries, improving transaction speed and data integrity.
- Integrated SonarQube reducing code smells by **30%** and implemented Jenkins CI/CD pipelines.
- Worked on Mendix backend modules and frontend technologies.
- **Tech Stack:** Java | Spring Boot | Mendix | JavaScript | HTML | CSS

Projects

• ShopFlow – E-Commerce Microservices Platform

Built event-driven backend using **Java 17, Spring Boot, Spring Cloud, MySQL**. Microservices architecture with **Eureka | API Gateway**. Used **RabbitMQ** for async communication. Secured APIs using **JWT | Spring Security**, documented using Swagger, containerized using Docker.

Tech Stack: Java 17 | Spring Boot | Spring Cloud | Microservices | RabbitMQ | MySQL | JWT | Docker | Eureka | API Gateway | Swagger

GitHub: [shopflow-microservices](#)

• LendingPro – Loan Management Platform

Developed loan system using Java, Spring Boot, MySQL with EMI scheduling, reporting, audit logging. JWT authentication and Spring Security. JasperReports and Docker integration.

Tech Stack: Java | Spring Boot | Spring Security | JWT | MySQL | JPA | Hibernate | JasperReports | Docker

GitHub: [lendingPro-loan-management-platform](#)

Technical Skills

Languages: Java, SQL, JavaScript

Backend: Spring Boot, Microservices, REST APIs, RabbitMQ

Frontend: React, HTML, CSS

Databases: MySQL, JPA, JDBC

Tools: Git, Maven, Docker, Jenkins, Postman, SonarQube, Swagger

Testing: JUnit, Mockito

Reporting: Jaspersoft, Apache POI
